

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

**Attachment B:
Richland - Hanford Site - D&D of the River Corridor
Project Operating Plan**

BACKGROUND

Recovery Act Project: Richland - Hanford Site - D&D of the River Corridor

TAFS: 89-09/10-0253

Project Identification Code: 2002111

Recovery Act Bill Reference: PL 111-5, Title IV – Energy and Water Development, Defense Environmental Cleanup (H.R. 1-26)

Project Cost: \$442,265,000

Budget Authority: 06049, FD.02.11.00.0 - \$442,265,000

Program Office: Environmental Management (EM)

Recovery Program Plan: EM - Defense

Management Office: Dave Brockman, Manager, Richland Operations Office, David_A_Brockman@rl.gov, 509-376-7395
Jon Peschong, RL Recovery Project Manager, Richland Operations Office, Jon_Peschong@rl.gov, 509-376-4424

LEADS

Implementation: Richland – Hanford Site

Breakthrough: NA

Laboratory: NA

I. SUMMARY & OBJECTIVES

Summary:

This American Recovery and Reinvestment Act (ARRA) Project supports the mission of DOE and the Office of Environmental Management (EM) by 1) Completing deactivation and decommissioning (D&D) of facilities that provide no further value to reduce long-term liabilities and maximize resources for cleanup, 2) Remediating sources of soil and ground water contamination with radioactive and hazardous constituents, and 3) Reconfiguring/relocating/replacing systems impacted by D&D that are required to support remaining site operations in a safe and cost effective manner to reduce risk.

By the end of fiscal year 2011, thirty facilities in the 100K Area will be decontaminated and demolished. Additionally, twenty-three waste sites will be remediated in the 100K Area. The Environmental Remediation Disposal Facility will be expanded with the construction of Cell 9.

The original scope and purpose of the existing contract will not change with the addition of the Recovery Act (RA) funding. The overall goal is to accomplish the mission of DOE-RL by eliminating environmental threats to the Columbia River and reducing the

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

overall footprint of the Hanford Site through demolition of contaminated facilities and remediation of burial ground.

This Recovery Act work ties to the following DOE and EM Strategic Goals and Themes:

- DOE Strategic Goal/Theme 4 –Environmental Responsibility – Protecting the environment by providing a responsible resolution to the environmental legacy of nuclear weapons production.
- DOE Strategic Goal/Theme 5 – Management Excellence – Enabling the Department’s mission through sound management and business practices.
- EM Goals – To safely disposition large volumes of nuclear waste; safeguard materials that could be used in nuclear weapons; deactivate and decommission thousands of contaminated facilities no longer needed by the Department to carry on its current mission; EM is fulfilling its commitments to reduce overall risk and complete cleanup across all sites for generations to come.

Public Benefits:

Numerous on-site jobs will be created and/or retained by implementing this project, bolstering the local economy. In Washington, the unemployment rate is 8.4 percent. Major types of workers required for this work include construction labor, engineer, heavy equipment operator, field technician, truck driver, and administrative support worker. The large number of workers trained by completing this project will be available for future missions. Personnel brought in for this initiative could also provide a critical source of employees to support completion of the EM mission at the site necessitated by the current aging Hanford workforce and attrition associated with the expanding nuclear industry. Surrounding area businesses will also experience a job creation benefit from this work scope initiative. Additional off-site jobs will likely be created in the surrounding communities due to the in flux of new workers.

This project will accelerate demolition of the K Area facilities and remediating potentially contaminated soil while creating jobs for the existing locally available skilled workforce. Additionally, this project will accelerate clean up of areas of the Hanford Site located in the Columbia River Corridor to a condition suitable for preservation, conservation, recreational, and industrial uses. This project will accelerate reuse of the Hanford infrastructure for other energy missions and community reuse.

Recovery Act Project Impacts:

Investment in this project will reduce the overall operational footprint of the Hanford Site through removal of the K East and West Basins and remediation of potentially contaminated soil below the basins, through substantive remediation of areas along the Columbia River, and through the operation of ERDF in a manner that effectively supports Hanford Site field remediation thereby eliminating environmental threats to the Columbia River. This project will provide a rough order of magnitude (ROM) savings of \$500M and will enable reuse of EM infrastructure for other energy missions and/or community reuse.

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

II. COST & SCHEDULE

Funds Returned and Offsetting Collections

NOTE: No returned funds or any offsetting collections are expected to be received as a result of carrying out any Recovery Act project.

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

Table 3: Funds Returned and Offsetting Collections (\$M)

	FY 09	FY 10	FY 11	FY 12	FY 13	FY 14	FY 15
[Provide description and amounts for Funds Returned and Offsetting Collections]							

Indirect Costs

This work will be performed by facility management contractors either utilizing an approved indirect rate structure or billed as a direct cost. All Hanford contractor indirect rates are subject to an annual audit review by the Defense Contract Audit Agency (DCAA) and require final approval by the Contracting Officer.

The Plateau Remediation Contract (PRC) has a General and Administrative (G&A) rate of 15.6% (currently under DCAA review). G&A functions include Finance, Human Resources, Legal, Internal Audit, Procurement, Information technology, organizational administration, dosimeter and usage based services supporting overhead activities. Because G&A is distributed on a total cost base for the Plateau Remediation Contract (PRC), ARRA funds will also be assessed G&A. Since the ARRA funds represent a significant increase in contract funding it is likely the G&A rate will decrease in the out-years.

The River Corridor Closure (RCC) contractor has a single cost objective and therefore charges all activities as direct charges. As the Recovery Act funding is applied to the contract the contractor will have two final cost objectives and will therefore need to update their disclosed accounting practices. All Hanford contractor indirect rates are subject to an annual audit review by the Defense Contract Audit Agency and require final approval by the Contracting Officer. The actual indirect costs may be reported to DOE on a monthly basis

Changes to Baseline Budget

Table 4: Changes to Baseline Budgets (\$M)

Changes to Baseline Budget	Increase/Decrease	FY 09	FY 10	FY 11	FY 12	FY 13	FY 14	FY 15
Program Direction After FY 2010	Increase							
Continuation of New Programs	Increase							
Project Acceleration	Increase							

NOTES: The RL Recovery Act projects involve accelerating existing projects. This will result in changes to the baseline budgets in the long term. Potential out-year savings include accelerating suspect transuranic waste retrieval, solid waste

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

treatment, demolition of facilities, and field remediation originally scheduled to take place in 2016 and beyond to be completed during FY 2009-2011 through utilization of Recovery Act funds.

DRAFT

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

Milestones

The milestones and performance measures provided in Table 6 are based on the best available information about ARRA requirements and pre-work authorization project definitions. Rough order of magnitude (ROM) estimates have been developed to date for costs and associated end-state and interim milestones and performance measures. These assumed ARRA funding availability in the second quarter FY09. It is expected that as the detailed estimates and resource-loaded schedules (using Primavera 6.2) are developed, there will be some change to cost estimates, milestones and performance measures.

As this scope will be integrated into the RL baseline, but tracked and reported separately and uniquely, the internal DOE approved change control process will be applied to all ARRA scope. It is assumed that there will also be a future DOE-HQ change control process associated with costs, milestones and performance measures that have been reported to date and included in this plan.

Table 5: Delivery Schedule for Capital Asset Projects N/A (until OECM and EM agree on the 413.3A graded approach)

Program/OECM Milestone	Delivery (End) Date	Comments
Develop capital asset projects Integrated Project List	N/A	N/A
Develop Parametric Performance Baseline (Individual Projects)	N/A	N/A
If < \$100 M Perform IPR, > \$100 M Perform EIR (Individual Projects)	N/A	N/A
Approve Performance Baseline	N/A	N/A
Approve Start of Construction	N/A	N/A
Approve Project Completion	N/A	N/A

NOTES: RL has no Capital Asset Projects that will be funded by Recovery Act funds.

III. PERFORMANCE

Performance Measures

The project will regularly report on all aspects of project cost including schedule, performance, results and impacts. Reporting of the estimation of jobs created and retained will also be made.

Within 120 days after the effective date of the contract modification, the contractor shall propose to the Contracting Officer a Contract Performance Baseline to accommodate the Recovery Act Project scope.

The period of performance for the Recovery Act work begins April 2009 through September 30, 2011.

The following reporting procedure will apply to the submission of monthly cost reports for Recovery Act work specified in the accelerated work scope baseline.

- (a) DOE will conduct a review of the contractor’s proposed EVMS for compliance with ANSI/EIA-748 according pursuant to DOE Order 413.3A.
- (b) The contractor shall certify in each monthly report that the costs included in the report for Recovery Act work were incurred only to accomplish the Recovery Act work in accordance with the accelerated work scope.

Table 6: Project Performance Targets

NOTE: The Project Performance Targets table will be populated starting at the beginning of the 4th quarter FY2009.

Recovery Act Project Identification Code	2002111
Linkage To S-1 Priorities	National Security and Legacy - Accelerate decommissioning of nuclear facilities and contaminated areas in the Central Plateau area of Hanford.
Linkage to Current Program Goal (if applicable)	DOE Strategic Goal/Theme 4 – Environmental Responsibility – Protecting the environment by providing a responsible resolution to the environmental legacy of nuclear weapons production. EM Goals – To safely disposition large volumes of nuclear waste; safeguard materials that could be used in nuclear weapons; deactivate and decommission thousands of contaminated facilities no longer needed by the Department to carry on its current mission; EM is fulfilling its commitments to reduce overall risk and complete cleanup across all sites for generations to.

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

Two-Year Outcome-Oriented Performance Measure	By the end of fiscal year 2011, 30 facilities in the 100K Area will be decontaminated and demolished. Additionally, 23 waste sites will be remediated in the 100K Area. Construction of ERDF Cell 9/10 will be completed.
First Year Performance Target (2009)	Initiate procurement activities for River Corridor Remediation
Q3 - Project-Level Quarterly Performance Milestone(s)	<ul style="list-style-type: none"> • Provide Contractor with Notice to Proceed. • Initial Change Request submitted
Q4 - Project-Level Quarterly Performance Milestone(s)	<ul style="list-style-type: none"> • Complete Contract Modification for definitized ARRA workscope. • Initiate K Area facility D&D and field remediation activities • Initiate subcontract for ERDF Cell 9 Construction • Final Change Request submitted
Second Year Performance Target (2010)	Achieve progress in River Corridor D&D and remediation
Q4 - Project-Level Quarterly Performance Milestone(s)	<ul style="list-style-type: none"> • Complete demolition of 10 facilities at 100K Area • Complete 10 waste sites at 100K Area
Third Year Performance Target (2011)	Achieve River Corridor D&D and remediation completions
Q4 - Project-Level Quarterly Performance Milestone(s)	<ul style="list-style-type: none"> • Complete ERDF Cell 9 • Complete demolition of 20 facilities at 100K Area • Complete 70 waste sites at 100K Area

National Strategic Benefits

This project provides for protection of the Columbia River and therefore has significant benefit to the Pacific Northwest. It does not directly provide national strategic benefit such as reduction of carbon emissions or oil consumption.

Table 7: National Strategic Benefits

NA

IV. MANAGEMENT

Secretarial-level Items

Table 8: Secretary's Priorities

Secretary's Priorities	Project Impacts (Qualitative)	Project Impacts (Quantitative)
Science and Discovery		
Clean, Secure Energy		
Economic Prosperity	<ul style="list-style-type: none"> • Create new jobs. • Retain existing jobs. 	The expected number of new jobs created from this Recovery Act project (TBD)
National Security and Legacy	<ul style="list-style-type: none"> • Eliminate environmental threats to Columbia River. • Remediation of facilities. 	<ul style="list-style-type: none"> • Eliminate 30 facilities along the Columbia River • Remediate 23 facilities along the Columbia River.
Climate Change		

Collaboration and Coordination

Upon the completion of this project, there will be new and additional expertise within DOE on Decontamination and Decommissioning of contaminated facilities. This knowledge and expertise can be used on a global scale to assist other countries dealing with contaminated facilities that provide no further value and therefore reduce risks to the world.

The DOE Nevada Test Site, Energy Solutions in Utah, and other commercially-operated waste treatment/ storage/disposal Facilities will be needed to support treatment and disposal of waste generated during the Recovery Act Project. Coordination with these interfaces already exists however will be enhanced throughout this project. Maintaining continuity of available disposal capacity for Class A and Greater-Than Class A Mixed Low Level Radioactive Waste is important to the project.

The DOE-RL Procurement Division will continue to work closely with DOE-EM and DOE-MA to insure timely business clearance approval for procurement actions that exceed local authority.

Training programs and/or courses will be established and provided at the HAMMER Training Center for identified positions which may require additional training outside of standard site training courses. This training will continue to be used throughout other federal and state agencies, as well as private organizations further preparing individuals to resolve similar challenges throughout the world.

There are many external interfaces associated with the normal operations at SRS. These include:

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

- **Regulatory** Environmental Protection Agency, Washington Department of Ecology, Department of Transportation, and Defense Nuclear Facilities Safety Board
- **Community** Hanford Advisory Board, Benton and Franklin Counties, Surrounding States, Nevada, and Utah
- **Industry** Environmental Engineering/Remediation, Waste Management, Construction, Cement, Container, Transportation, Housing, Utilities, etc.
- **Other** Other RL Contractors, Labor Unions, Parent Companies, Local Universities/Colleges

Federal Infrastructure Investments

There are no infrastructure investment project activities associated with this Recovery Act Project.

However, ancillary benefits may be achieved through the elimination of facilities resulting in reduced electrical power consumption and corresponding reduction of greenhouse gas emissions. Reuse/Recycle of excess materials could result in reduced consumption in fossil fuels required to process raw materials.

These facilities contain hazardous or radiological material. Accelerating the removal and proper disposal reduces risk of releases of this material to the environment.

Line Management

DOE-RL intends to use existing EM site systems and practices to effectively monitor and report on the Recovery Act Project activities, including:

- Fully implement all Recovery Act transparency and reporting requirements through modifications to the contract that will fund this Recovery Act Project.
- Continue applying project management principles to Recovery Act Project execution, including reviewing and validating EM project cost and schedule baselines consistent with DOE Order 413.3 and identifying project risks and strategies for managing them.
- Continue use of industry standard Earned Value Management System (EVMS) to compare actual project scope, cost, and schedule performance against planned performance as depicted in the baseline.
- Continue monitoring of the contractors' EVMS reports to ensure the Recovery Act Project is on track and, if not or if trends are in a negative direction, to develop and implement corrective actions.
- Hold monthly management reviews to provide updates on the Recovery Act Project to EM's senior-most executives.

Project Operating Plan – Richland - Hanford Site - D&D of the River Corridor

- Secure support service contractors to provide limited augmentation of federal procurement, budget and finance, project controls, and technical oversight capabilities for the Recovery Act Project.
- Assign appropriately qualified staff to the Recovery Act Project to provide technical and programmatic oversight of the contractors performing the work and be the day-to-day governmental interface and manager for the project.
- Use an Integrated Project Team (IPT) of Federal and contractor staff with project knowledge and subject matter expertise essential to the successful planning and execution of the project – including safety, risk management, engineering, quality assurance, contracts administration, and project controls.
- Develop detailed risk management plans for the Recovery Act Project to identify and mitigate risks, and assign roles and responsibilities for managing the risks.

Needs from Staff Offices

N/A

1) Human Capital

DOE-RL intends to use and support service contractors to provide limited augmentation to federal staff in the areas of procurement, budget and finance, project controls, and technical oversight. DOE-RL is nearly staffed to the DOE Environmental Management program’s "Best-In-Class" federal staffing levels for both acquisition and project controls. In addition, DOE-RL will be required to hire additional federal Accountants and Contract Specialist staff.

NOTE: DOE-RL has developed an integrated incremental staffing profile to perform ARRA work. This staffing profile is wholly contained in River Corridor D & D Project Operating Plan (2002140).

Table 9: Information on Hiring Under the Recovery Act

# & Type of Positions (Title, Series and Grade)	Location (HQ or Field – w/location)	Federal or Contractor	Timeframe (1-6mos; 6+mos; other; specify date needed if possible)
